(in shipment sizes of 10,000-70,000 MT)
Forward freight cover in single shipments and contracts
Ocean freight feasibility studies
Integrated bulk transport solutions
Commercial management of vessels

Services Include

wherever you go

Brobulk Limited

Dry Bulk Operator

Through the operating company, Brobulk Limited, GAC has been offering freight contracting services since 1991. Brobulk is a well-established ship operator, controlling chartered tonnage primarily in the 15,000-75,000 DWT range, carrying a wide range of dry cargo commodities including steel scrap, rice, sugar and agricultural products.

Local Expertise

Brobulk is a full service company offering trading companies and other charterers the opportunity to outsource their bulk and break-bulk ocean freight requirements to an organisation with significant maritime expertise and financial stability.

Besides port-to-port ocean freight cover, Brobulk offers a range of value-added services for principals with more extensive needs, by aligning its in-house chartering capability with GAC's logistics skills and local know-how, to offer total packages:- Brobulk is able to combine ocean freight, port agency, stevedoring, customs clearance and inland transport to final destinations, using through bills of lading where required.

Available for both single and multiple cargoes, these facilities can be further combined with additional ship/shore services, such as pre-carriage, cargo surveying and bagging.

Global Reach

Given Brobulk's strong understanding of the bulk cargo markets, we can combine GAC's worldwide network with our own supercargoes to deliver superior performance in almost any location. Besides possessing the local expertise, it is Brobulk's priority to establish close working relationships with the relevant local authorities, and the shipping and transportation industries, in all locations - wherever you go.
