# Proven expertise in wind farm construction support, on and offshore

The search for alternative energy sources is on – and offshore wind farms are being developed to help meet the needs of an energy-hungry planet. But it takes special expertise, equipment and experience to transport heavy and oversized cargo to site for this growing sector. Specialist personnel, innovative thinking and the latest tracking technology are needed to effectively handle the transportation of wind energy cargoes.

GAC Project Logistics meets the renewable energy logistics challenge, using its global network, extensive resources and experience in developing and executing complex project logistics solutions to provide safe and timely delivery to and from some of the world's most challenging and remote places.

From moving massive turbines to handling delicate windmill blades, we have the skills and strength to guarantee safe and timely delivery worldwide. Commitment, experience and efficiency form the essence of our services, whether it be handling a single domestic inland delivery or managing a long-term complex, multi-shipment and multi-modal wind farm project.

## A solution for all challenges

We have a proven track record of providing complete transportation solutions for turnkey projects. Clients benefit from GAC's portfolio of integrated shipping and logistics services – including ship agency, Customs clearance, vessel charter and inland transport management.

No matter what challenges you face, such as time, space or even budget constraints, it's our role to find the best solution.

## Quality and service

GAC Project Logistics is committed to providing quality service without compromising cost-efficiency and availability to customers around the clock, around the world. Wherever we operate, our staff has detailed knowledge of local regulations and practices, and are focused on minimising costs and optimising resources.

The GAC Group is committed to the highest standards of HSSE (Health, Safety, Security & Environment), based on the belief that good HSSE practice is fundamental for the wellbeing of our staff, customers, suppliers, subcontractors and the cargoes we handle.

As a leader in the shipping, logistics and marine industries, GAC is proud of that ongoing commitment to deliver the highest quality standards through our strong team of dedicated and experienced professionals.

  - Storage and staging yard facilities and management

## Specialist in shipping, logistics, marine and related services

GAC is a global provider of shipping, logistics and marine services. These services are constantly being refined and integrated to serve our customers' increasing need for competitive solutions. Emphasising trust, reliability and a strong human touch, GAC has been building its reputation in its chosen markets since 1956.

Headquartered in Dubai, GAC employs over 9,000 people in more than 300 offices worldwide.

In GAC Project Logistics, we've combined our capabilities in logistics, ship agency and offshore marine support to offer complete solutions for project moves of any scale and complexity.

### What makes GAC Project Logistics services special?

- Wide geographical coverage
- Proven track record in wind energy logistics, both onshore and offshore
- Cost efficient solutions using innovative transport combinations
- Long-term relationships with specialists in sea, land and air operations
- Flexible tracking systems and IT solutions
- Dedicated project teams with extensive technical and operational expertise and experience
