

GAC logistics

The power of one

wherever you go

One world

Although the world may seem to be getting smaller, it's still a daunting task for most companies to control the flow of goods across it efficiently. And different local customs only add to the challenge. That's why more and more companies are looking to outsource their logistics and distribution functions, and focus on their core business.

If you're one of them, GAC Logistics is the place to look. We've created a network for today's interconnected world—one that is global in scope but built on a solid foundation of local GAC offices and partnerships. Our far-reaching logistics solutions help you gain an edge in today's intensely competitive global marketplace.

Over half a century of experience

Founded in 1956 in Kuwait by a group of Swedish shipping executives, GAC emerged from the Arabian Gulf and a maritime background. Now the GAC Group, an independent organisation offering integrated logistics, shipping, marine and related services, is a worldwide force. And GAC Logistics, one of the Group's arms, is as much at home on land and in the air as it is at sea.

All told, the GAC network consists of over 300 offices in more than 40 countries and carefully selected partners elsewhere, covering thousands of locations.

Meeting diverse needs

We serve a broad range of diverse companies with unique needs. And we have special expertise in the consumer goods, textile, pharmaceutical, automotive, electronics, oil & gas and entertainment industries.

Spanning the world's major trade lanes, the GAC Logistics network covers efficient air, road and sea transport. It gives customers access to modern storage and transport facilities in key locations. And it ensures up-to-date expertise in important areas such as inventory control, supply chain management and international security.

In other words, the power of GAC works for you—wherever you go.

Whether it's delivering luxury cars or costumes for the catwalk, or even making sure a touring celebrity's set arrive on time, GAC Logistics has the resources and expertise.

One call

You're awaiting a shipment in Rotterdam. The promised delivery date comes and goes, and still no sign of your container. Do you contact the shipping company? The vendor in Changhua? The terminal operator? The port authorities? Or maybe the trucking company that was supposed to take the shipment from the harbour to your headquarters...

Fortunately, it's not a dilemma our customers ever face. Because GAC means more than just expert global coverage—it also is your assurance of global responsibility. Whether delivering a one-time parcel, participating in a long-term project or managing a global supply chain, GAC stands for end-to-end accountability to and from any point on the globe.

Efficient, effective service

We know logistics is mission critical for your company, not only when it comes to the production line, but also for your bottom line. GAC Logistics regularly reviews long-standing partnerships with major carriers with the goal of obtaining the best rates and service for GAC customers.

We tailor and integrate our services to your needs, coordinate the entire physical process and keep you informed at all times.

Innovative partnership

Our expertise in a number of specialised sectors also provides an excellent basis for designing innovative solutions to complex logistics challenges. Consumer goods suppliers, for instance, are partnering with GAC on setting up global super hubs, while automobile manufacturers have turned to us for help with global sourcing of components into growing manufacturing centres like China.

More than half a century of experience has given us a unique ability to develop and execute the optimal solution for any given logistical challenge. And an ability to handle emergency situations ensures we are poised to deal with whatever else might come along. Which could be why our customers make one call, then rest easy.

GAC Logistics stands for end-to-end accountability to and from any point on the globe.

One standard

You're in good hands with GAC Logistics. Whether the subject is warehouse management, information technology or cargo security, GAC Logistics is up-to-date on advanced systems and solutions. And no matter where in the world you go, you can be assured that you'll encounter GAC's consistently high standards.

Warehouses are computer-controlled by GACWare, our online system for efficient inventory management. Detailed tracking systems ensure effective marshalling and accessing of space, providing higher throughput and fewer bottlenecks. At the same time, temperature-controlled vehicles transport cargo to and from these state-of-the-art facilities.

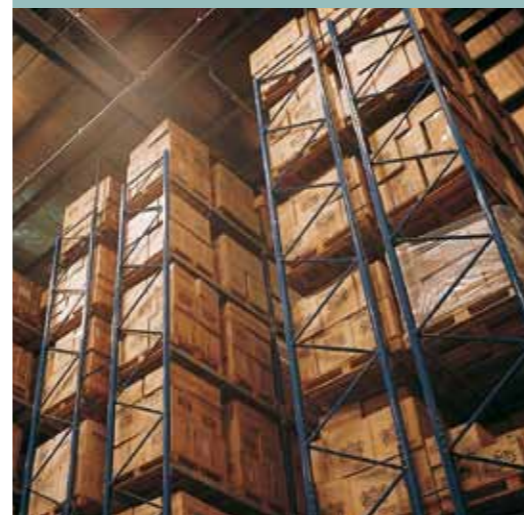

Every step of the way GACFreight, our global IT system, monitors customer cargo and provides real-time progress reports. Customers can log on day or night for complete cargo visibility and peace of mind.

At sea, our specialised ship spares logistics service covers the entire supply chain management of ship spares and marine parts. Again, sophisticated information technology plays a key role in providing ship owners, ship management companies, ship builders and manufacturers with a visibly seamless, end-to-end solution.

Security a top priority

GAC Logistics actively follows developments in the increasingly important area of security. Worldwide, we are complying with new measures such as C-TPAT and AMS to ensure the highest security standards for our customers—standards as demanding as your own.

Logistics facilities are computer-controlled by GACWare, our online warehouse management system.

One stop

Efficient coordination is a major advantage of dealing with a one-stop logistics supplier like GAC. Learn more about the synergies of using GAC for all your logistics needs.

Ocean Freight

GAC Logistics offers an economical sea route for cargo between Europe, the Americas, the Middle East and Asia. Using the services of CargoGulf, a global non-vessel operating common carrier (NVOCC), shipment at competitive rates is available for both less-than-full-container-loads (LCL) and full-container-loads (FCL).

Air Freight

For fast and efficient transport to and from any city around the world, choose GAC Logistics. Once again, GAC's size and bargaining power work to your advantage. Our global partnership agreements with the major carriers enable even the most urgent requests to be met quickly and at fair rates. A service combination of sea and air freight is also available to offer flexibility as well as savings on all air cost and all sea transit times.

Road Transport

GAC's assets extend to our own fleet of trucks. Our vehicles include advanced temperature-controlled units and dual compartment trucks operating at varying temperatures. These modern vehicles provide ideal conditions for temperature-sensitive goods and other delicate cargo.

Warehousing and Distribution

GAC operates state-of-the-art logistics facilities throughout Europe, the Middle East, Asia and the Indian Subcontinent, enabling companies to reduce their capital investment and allowing a flexible response to market demands. We meet customer needs for safe storage, fast order response and minimum inventory levels.

Project Logistics

We also provide solutions for complex logistics tasks. Whether getting an oil rig safely to its destination or making sure that a touring celebrity's instruments, props and staging arrive on time, GAC Logistics has the requisite experience, skill and resources.

Marine Logistics

This specialised service covers the entire supply chain management of ship spares and marine parts. By leveraging the combined infrastructure and expertise of GAC Shipping and GAC Logistics, the service provides ship owners, ship management companies, ship builders and manufacturers with a seamless, door-to-door delivery solution that is time and cost-efficient.

International Moving

For more than 30 years, we have been helping companies move personnel in and out of the Middle East. As a registered member of the world's leading international moving associations, we plan each move professionally and carry it out with full respect for the customer's personal effects and schedule.

One goal

In the competitive market of logistics services, suppliers who don't innovate don't last. For more than half a century, GAC has been thinking creatively to solve the most complex logistical challenges and bringing new ideas to even "routine" distribution assignments. We think that's the only responsible way to grow your business — and ours.

We stay in touch with the market's needs by maintaining an ongoing dialogue with our customers. By utilising methods as up-to-date as the Internet and as personal as face-to-face communication, we make sure that we and our customers are always reading from the same page. Because, after all, we have the same goal as you — to ensure your expectations are met, each and every time we work together. Each and every place you go.

GAC reaches out to customers through the printed word, at exhibitions, online, and through a variety of exciting corporate marketing activities.

Specialist in logistics, shipping, marine and related services

GAC is a global provider of shipping, logistics and marine services. These services are constantly being refined and integrated to serve our customers' increasing need for competitive solutions. Emphasising trust, reliability and a strong human touch, GAC has been building its reputation in its chosen markets since 1956.

Headquartered in Dubai, GAC employs over 9,000 people in more than 300 offices worldwide.

GAC Logistics, the freight forwarding and distribution arm of the Group, specialises in logistics and supply chain solutions. Its operations are aimed at satisfying the needs of international and local companies alike for first-class logistics support from a dependable partner. Its knowledge of local markets has helped open doors for companies worldwide, and its services have helped keep the wheels of commerce turning for more than half a century.

GAC Logistics serves a broad range of companies and has special expertise in the consumer goods, textile, pharmaceutical, automotive, electronics, oil & gas and entertainment industries.
