## Covering All USA Ports

Established in 2002, GAC's growing presence in the United States has been bolstered by the acquisitions of two major shipping partners: Rice, Unruh, Reynolds Co. and OBC Shipping.

### Comprehensive coverage

With offices throughout the East, Gulf and West Coasts of the United States, GAC offers a complete suite of shipping services to principals at any port, terminal or lightering area. GAC is also fully staffed to provide a wide range of husbandry services to ship owners and managers, ensuring the principals' needs for ship spares, crew matters and repairs are attended to in a prompt and professional manner.

### Excellent industry contacts

Given GAC's established presence in the United States, excellent relations have been built with both public and private sectors of the industry. These include port authorities, government agencies, surveyors, stevedores and other marine related companies.

### Fast and efficient turnaround

Driven by the need for speed and efficiency in handling each port call, GAC leverages detailed knowledge of local regulations to help principals control time-related port costs. To further facilitate smooth turnaround, GAC offers critical services such as eNOA and AMS fillings. GAC also works with the relevant parties to verify that the ships are cleared and ready for entry to the port.

### Diverse capabilities

GAC's ship agency expertise in the USA covers a diverse range of sectors including dry bulk, general cargo, tankers, ro-ro and cruise. Tapping into the Group's marine skills and knowledge, GAC USA is also well equipped to handle any requirement of the offshore industry such as mobilizations, demobilizations, offshore support and crew transfers.

### Commitment to quality & HSSE

GAC USA has achieved the DNV ISO 9001:2000 certification and uses GAC Group's Quality Management System that incorporates every aspect of the services provided to principals. In line with the company's business philosophy, GAC USA also complies with the standards laid out in GAC Group's Health, Safety, Security and Environment (HSSE) Policy.

### Advanced IT systems

The widespread use of our business-driven IT applications provides our Principals with not only the latest port news globally, but also time-sensitive voyage and operations information.
