Service Highlights

wherever you go

GAC Logistics AOG Support

Around the world, around the clock

GAC has been delivering the goods – including aircraft spares – for more than half a century, continually building on and benefiting from long term relationships with business partners, customers and suppliers.

We've enhanced and refined our logistics skills to meet the specific needs of the AOG, MRO and related industries to provide fast, dependable and efficient delivery of aircraft parts – wherever you go.

GAC Logistics offers a seamless single-source service – from pickup at the supplier's door to delivery. We take responsibility for the entire supply chain, ensuring complete peace of mind.

The service is convenient to use. Just tell us what's needed where by phone, fax, email or SMS, and we will ensure that your critical consignment connects with the NFO (next flight out). Progress will be monitored, controlled and communicated to you every step of the way.

And it's flexible. Choose the mode of transport that best matches your requirements: air freight (charter if required), courier, road. We'll help you compare the time and cost constraints of all the options and recommend the mode that works best for you.

GAC Logistics' AOG services put the muscle of GAC's entire global network at your disposal – providing world-class service to and from more than 1,000 locations worldwide.
