GAC Benair Logistics

Supply Chain Services for the Ornamental Fish Industry

Focus on relationships

GAC Benair Logistics is the UK's leading and most experienced international importer of ornamental fish, with a proven track record of serving many of the UK's largest aquatic importers and specialised independent retailers.

Our reputation has been built on long-term relationships with business partners, customers and suppliers – relationships that we nurture continuously to ensure that GAC Benair Logistics remains the UK's primary supplier to the ornamental fish industry.

Unrivalled experience

We've enhanced and refined our traditional logistics skills to meet the constantly evolving needs of the livestock environment to provide fast, dependable and efficient supply chain management.

Not only do we take care of the highly delicate and specialised demands involved in the transportation of live fish, we also handle all necessary quarantine documentation, airline requirements, coordination with local authorities and customs formalities.

Global sources

In addition to extensive ranges of rare and exotic coldwater, tropical and marine fish, we also offer aquatic plants, corals, invertebrates and live rock from all over the world, and especially the Far East, South America, Africa and India.

First rate customer service and expertise

Our extensive team of livestock operators is unrivalled in terms of its dedication, experience and professionalism, consistently going above and beyond to ensure the fastest customs clearance, optimum levels of communication and friendliest service available.

Advantages

- Access to massive ranges of all types of ornamental fish, plants, invertebrates, corals, live rock and other items
- Global coverage
- A true one stop shop for livestock and aquatic supplies
- Cost savings through economies of scale and global purchasing rates
- Time-definite, guaranteed delivery and collection
- Complete visibility of entire supply chain
- Consolidation lists available on request

GAC Benair Logistics has no links or connections with the handling or importing of live animals on behalf of Huntingdon Life Sciences or any other research company – directly or indirectly. We have never had, nor intend to have, such links. GAC Logistics provides import services to bona fide importers of ornamental fish, none of which are for research purposes.
