GAC Hong Kong

Logistics Services

Global network, local expertise

Established since 1974, GAC Logistics (Hong Kong) is part of the GAC Group, a global shipping, logistics, marine and related services provider with over 300 offices worldwide.

The combination of our in-depth local knowledge with the worldwide infrastructure and resources of the Group enables us to offer a full range of logistics and supply chain solutions at competitive prices. Our cost efficiency is also ensured through centralised freight purchasing and strong relations with major air and sea carriers.

Gateway to South China market

Ideally situated at the crossroads between the East and West, we have been facilitating cargo flow along key trade lanes such as Asia-USA, Asia-Europe, in particular traffic originating from South China.

Having our own warehouse located close to the airport facilitates the rapid movement of cargo, ensuring customers' valued goods reaches the market as scheduled.

24/7 customer support

With a dedicated team assigned to each account, customers are always assured of prompt assistance for all their needs. Whether it's request for delivery updates, cargo movement, or emergency support, GAC is available round-the-clock.

Highly competitive rates

Cost efficiency is ensured through centralised freight purchasing and strong relations with major air and sea carriers. As such, we are able to pass on the cost savings to our customers.

Track record in serving diverse sectors

GAC Logistics serves a broad range of international manufacturers, distributors and retailers in the consumer goods, textiles, pharmaceuticals, automotive, electronics, and oil & gas sectors.

Whether delivering computer parts, costumes for catwalk, or even making sure a touring celebrity's instruments and staging arrive on time, GAC has the requisite experience, skills and resources.

Modern IT capabilities

Our advanced IT system plays a key role in providing customers with the visibility of their cargo at every step of the supply chain. In addition to monitoring cargo movement, our systems are able to generate management reports on statistics, inventory flow and key performance indications.

Compliance to security standards

GAC exercises due vigilance and diligence to comply with measures to ensure the highest security standards for our customers. Besides being part of a C-TPAT network, we are also compliant with US Customs AMS regulation.
