GAC Turkey

GAC is a pioneer in the Turkish shipping industry with over 40 years of experience. GAC Turkey operates an integrated network across the country including the head office in Iskenderun and several branch offices in Istanbul, Izmir, Gemlik/Bursa, Mersin, Ankara and Antalya. Our network covers all Turkish ports as well as those in the neighbouring country of Georgia.

GAC Turkey Logistics Services is part of the GAC Group, established in 1956 and now with over 300 offices worldwide employing more than 9000 people.

GAC's core business covers three key areas: shipping, logistics and marine services.

GAC Turkey Logistics Services commenced operations in 2000, offering a wide range of solutions to meet any freight forwarding and distribution needs. GAC Istanbul is the hub for air, sea and overland shipments with excellent distribution channels not only to and from neighbouring countries but also far beyond.

GAC Turkey Logistics Services specialises in a complete range of supply chain and logistics solutions. These include air freight as an IATA approved agent and sea freight as a short sea NVOCC operator. GAC Turkey Logistics Services offers regular consolidated container (LCL) services to Dubai and beyond, and from India to Turkey.

Door-to-door transportation, warehousing and distribution, project cargo, marine logistics and liquid transportation are some of the other services we offer to our customers.
