GAC Turkmenistan

Local knowledge, global reach

Global reach

As part of the GAC Group with over 300 offices worldwide, GAC Turkmenistan puts the resources and infrastructure of the global network at your disposal. From marine support to a comprehensive range of logistics and transportation services, GAC has the solutions both offshore and onshore.

GAC Turkmenistan is today one of the biggest offshore operators in the Caspian Sea, offering a wide range of marine activities - from offshore support vessels to ship agency services and oil spill response. Other services include manpower and crewing, environmental support, logistics & freight forwarding and business management services to assist potential partners to conduct business in Turkmenistan.

In line with the Group's business philosophy, GAC Turkmenistan is committed to providing cost efficient and professional services in compliance with Health, Safety, Security and Environment (HSSE) practices.

Marine support expertise

GAC Marine has been active in Turkmenistan for more than 10 years. Its fleet of 21 offshore vessels makes it one of the largest companies in the Caspian, with representative offices in Turkmenistan and Kazakhstan.

A well-maintained fleet of AHTS, PSV, AHT and high-speed crew boats make GAC Marine the first stop for clients from the energy sector, seeking top-quality support services in the Caspian. All GAC vessels are compliant with the ISM code and hold valid safety management certificates.

From its head office in Ashgabat, GAC provides coverage in all areas of Turkmenistan. Most of our workforce of almost 500 are highly-skilled Turkmen nationals, committed to supporting marine operations of any scale and complexity.

Over the past decade, leading international and domestic energy companies have used GAC Turkmenistan to support their offshore oil exploration and extraction operations in the Caspian Sea.

Our track record includes providing vessels and marine support to offshore gas production facilities as well as pipe lay commissioning and sea trial projects. (List of references available upon request)

Full fledged logistics base

GAC's success in marine operations in Turkmenistan led to the establishment of a fully-fledged logistics base to address the increasing need for professional logistics services, fully licensed under Turkmen law.

The main scope of services includes customs clearance, airfreight, shore based support services, land transportation and project logistics.

Our understanding of the specialised and time-sensitive nature of the oil and gas sector enables us to customise solutions to suit our customers' needs, providing a structured yet flexible approach.

GAC Turkmenistan Logistics has been involved in several successful movements of project logistics such as pipes, gas turbines, compressors in and out of Turkmenistan. To meet growing demand, plans are in place to expand our team of logistics professionals and purchase a fleet of trucks and cranes for the new Turkmenbashi supply base.
