GAC Norway

Global reach. Local expertise.

GAC Norway was formed as a result of GAC's acquisition of a majority stake in Ole R Olsen, the oldest ship agency in Norway. Today, GAC Norway is a company with global connections and the professional local capability needed to efficiently serve Principals calling at all ports throughout the country. GAC Norway is part of the GAC Group, the world's leading independent solutions and services provider for the global shipping, logistics and marine industries, with an integrated network of more than 300 offices worldwide.

Specialist services

GAC Norway specialises in providing world-class ship agency services to vessels loading and discharging liquid cargoes across all Norwegian oil and gas terminals, seismic vessels and coasters carrying dry cargo in the North Sea. GAC Norway is part of the Achilles certification network which makes us a qualified ship agency for both land and offshore requirements in Norway, and attends to more than 1200 calls of seismic vessels, crude oil, LPG, LNG, product and methanol carriers annually.

Comprehensive coverage

Operating from ten strategically located offices - Oslo (Slagen), Stavanger, Kaarstoe, Sture, Mongstad (Bergen), Kristiansund, Aukra, Tjeldbergodden (Trondheim, Stjordal), Hammerfest (Kirkenes) and Svalbard (Longyearbyen), GAC Norway provides complete coverage across all terminals and ports in the country. All activities and communication are centrally coordinated by our head office in Mongstad, Norway's biggest oil, gas and product terminal.

Fast and efficient turnaround

In addition to quick turnaround for all port calls, clients can also expect a response to all enquiries within 24 hours. Our fast and efficient operations, combined with detailed knowledge of local regulations, help Principals control time-related port costs.

Excellent industry contacts

GAC Norway has excellent relationships with both public and private sectors of the shipping industry. These include port authorities, embassies, classification societies, shipping associations, terminal operators, stevedores, shipyard facilities and suppliers.

IT strengths and capabilities

To ensure reliable communication and effective reporting for its Principals, GAC Norway is continuously updating its IT infrastructure. GACAgencyNow, GAC's own ship agency software, coupled with robust network, firewall and back-up applications, ensures that operations data is captured efficiently. Additionally, mobile communications for ship-side staff help us provide optimum levels of attention and ensure the changing needs of inport vessels are managed promptly and professionally.

Health, Safety, Security and Environment (HSSE)

GAC Group managers and staff believe that healthy, safe, secure and environmentally sustainable work is essential for the wellbeing of our employees, customers, suppliers and all other stakeholders who encounter the Group's services. GAC applies best practice in HSSE via a group-wide HSSE policy coupled with quality management systems.
