## Oil & Gas Support Services

Companies dealing with oil & gas exploration, power projects and fertiliser can now rely on GAC India's oil & gas support at facilities on India's east and west coasts.

### Global network, local expertise

GAC India is part of the GAC Group, a global provider of shipping, logistics, marine and related services, with an integrated network of more than 300 offices worldwide.

Since its inception in 1983, GAC India has been committed to providing quality service and customer satisfaction to local and international clients in all areas of shipping, agency and logistics services.

### Comprehensive services

GAC India's oil & gas support is set up as a total service package. It consists of initial advice and documentation work to facilitate the imports and re-exports of specialised marine equipments (rigs, platform support vessels), as well as consignments like drilling tools, machinery, ship spares and more. With this in mind, GAC India has put in place its own Customs House Agents (CHA) licenses and experienced staff to offer all services "in-house", from import to re-export.

### Serving diverse clientele

GAC India serves a wide range of clients from the oil & gas industry. These include oil and gas contractors in and around the various oil & gas fields in India, companies dealing with seismic cable laying, as well as operators of supply boats, tugs and barges.

### Professional and experienced team

Backed by a strong team of over 300 professionals, GAC India's 25 strategically-located offices across the country operate 24/7. Clients are always assured of prompt and comprehensive responses to all their requests.

### Commitment to quality and Health, Safety, Security and the Environment (HSSE)

All the GAC India's offices have achieved the ISO 9001:2008 certification, the internationally recognised seal of approval of quality systems and are well equipped with the latest technology. In line with the Group's business philosophy, GAC India also complies with the standards of Health, Safety, Security and Environment (HSSE) practices.
