GAC Oman

Ship Supply Services

Professionalism and safety are the hallmark of GAC Ship Supply Services. Our team of highly trained personnel provides a wide range of ship supply services in Muscat waters.

Compliance with international safety and security standards

Our compliance with international safety and security codes such as ISM and ISPS is one of GAC's key competitive advantages.

Purpose built fleet

We operate using GAC's own supply launch – GAC Sharq. With cruising speed of 10 knots and 1,500 liters capacity, the supply launch can meet any vessel within the operating limit of 30 NM from the nearest land.

Boosting a cargo carrying capacity of 3 tons and 17 passengers, GAC Sharq is used in attending to offshore requirements such as vessel clearance, crew changes, delivery of spares / provisions and emergency medical evacuation. We also assist in underwater inspections / surveys.

Service coverage

For provision of anchorage services, all vessels have to obtain inward / outward clearance. Offshore rendezvous are usually carried out at approximately 2-4 NM west of Fahal Island at location 23 40 N / 058 30 E.

GAC SHARQ

LOA: 16.40 M	Breadth: 4.91 M	Draft: 1M
