# GAC Dubai

## Tanker Shipping Services

Established since 1967, GAC Dubai provides a comprehensive range of shipping services to local and international clients in Dubai. As the local market leader, GAC Dubai attends to a wide range of vessels calling at Dubai's ports. Crude oil tankers, specialised gas carriers, container ships, dry bulk vessels, cruise liners – they all receive the same finely-tuned level of GAC services to ensure smooth sailing in the Gulf.

### Fuelling the world

In an energy-hungry world, the Middle East is still the key source of the oil and gas which fuels the global economy. The Gulf waters see a constant flow of tankers – which need special handling, especially with respect to safety considerations. With the experience and expertise to meet those demands, GAC Dubai is the agent of choice for its wide range of specialised services tailored to the needs of oil tankers and gas carriers calling at Dubai's ports.

### Tanker agency

Tankers calling for cargo operations at Jebel Ali or Fateh terminal are efficiently handled by GAC Dubai, with smooth turnarounds. GAC Dubai enjoys excellent relations with local authorities and terminal operators, ensuring prompt and efficient attendance of tankers in any situation.

### Ship supply services

GAC's services go beyond port limits. Its Ship Supply Service enables vessels passing off Dubai, Fujairah and Ras Al Khaimah

to take on supplies and effect crew changes or medical evacuations whilst passing or anchored offshore. GAC Dubai is one of the few Ship Supply Service providers in the U.A.E with its fleet of high-speed crew and supply boats having efficient on board systems fully compliant with ISM and ISPS codes.

### Dry dock agency

Vessels calling at Dubai Drydocks or Al Jadaf can be assured of efficient, full-spectrum support. GAC has extensive experience of attending to vessels calling for repairs, including tankers, LNG/LPG vessels, container ships, Ro-Ro vessels and even oil rigs.

GAC Dubai also assists vessels undergoing conversions from tankers to FPSOs. Services range from handling of crew and spares to arranging stores, accommodation, and visas.

### Agency support for offshore vessels

GAC Dubai specialises in providing husbandry support to various marine crafts working offshore. Vessels are assured of receiving the complete range of agency services round the clock.

### Shipping services at Fujairah

GAC is also a leading ship agent in Fujairah, attending to any type of port call including tanker, project cargo, dry bulk amongst others. In addition to ship agency, GAC offers a comprehensive range of specialised services from bunker supplies to slop removal services etc.
