# GAC Ship Supply Services in the U.A.E

## Dubai, Fujairah, Ras Al Khaimah and Khor Fakkan

GAC offers fast and safe delivery of ship supplies around the United Arab Emirates (U.A.E). Our fleet of modern high-speed launches operates round the clock, making it easier to manage crew changes, deliver spares, provisions and mail and to respond to emergency situations.

### Multi-purpose fleet in strategic locations

Operating from bases in Dubai, Fujairah and Ras Al Khaimah, GAC's own fleet of supply launches, is the most safe and comfortable transportation mode along the major sea-lanes in the U.A.E. Whether it is heavy cargo delivery or high speed long range operations, our services are designed to meet the diverse requirements of crew, superintendents, cargo inspectors, class surveyors – anyone who needs to board a vessel off the coasts of the U.A.E.

### Crew support services

A dedicated GAC crew desk takes care of crew members' needs and special requests. From daily consumables to souvenirs and gifts, our team of crew relations personnel are ever ready to source and deliver.

Our 24-hour "Meet and Greet" service at Dubai International Airport also provides prompt immigration and customs assistance, ensuring all arriving and departing crew members receive the best care possible.

### Ships spares management

For ship spares and marine parts where and when they are needed, shipowners and managers worldwide rely on GAC Marine Logistics' dedicated supply chain solutions. GAC's launch fleet offers the most efficient and reliable way for spares to reach the vessel deck. It is ideal both for a planned flow of components and emergency deliveries.

### Rescue and emergency mobilisation

GAC has an established reputation for emergency preparedness and capability. Our staff carry out regular drills and undergo rigorous training on how to handle any crises including oil spill, chemical spill, collision, grounding and fire. We are fully equipped with emergency and recovery kits.

### Highest safety standards

Our compliance with international safety and security codes is one of GAC's key competitive advantages. All GAC ship supply services operations are ISM and ISPS compliant, and are supported by STCW95 licensed staff.
