

GAC Bunker Fuels in partnership with REV LNG Marine

- LNG bunker supply chains
- LNG production and storage
- LNG bunker terminals and transport
- Integrated training / response readiness
- Bunker supply chain consultancy

The first end-to-end LNG fueling solution for vessels calling at American ports.

Delivering your strategy.

GAC Bunker Fuels has joined forces with LNG supply chain distributor REV LNG / REV LNG Marine to offer a competitive, reliable and cost-effective alternative in the U.S. for ship operators facing increasingly stringent emissions restrictions.

Strategic Partnership

In response to growing demand for LNG as a clean, affordable marine fuel, this strategic partnership offers a range of fueling options in cooperation with a portfolio of gas supply contracts to ensure the best prices, supported by LNG bunkering and marine LNG specialty services nationwide.

Expertise

GAC Bunker Fuels is the bunker trading / brokerage arm of the GAC Group with staff at key bunkering hubs and access to GAC's 300 offices in 50 countries around the world. Its round-the-clock support means there

is always someone on the ground, wherever you go, to oversee your supply. Not just behind a desk, but on the front line, actively supporting and promoting the development of stable and reliable LNG supply chains coast-to-coast, while streamlining the efficiency with which REV LNG and REV LNG Marine services are brought to market.

With a track record of delivering reliable bunker supplies for more than 25 years, GAC Bunker Fuels is committed to providing quality services in full compliance with the highest Health, Safety, Security and Environment (HSSE) standards. The company is also ISO 9001 and TRACE certified.

Full-service LNG supplier

The alliance combines GAC's global resources and reach with **REV LNG's** full-service liquefied natural gas supplier capabilities, including

liquefaction facilities and storage solutions. REV LNG serves customers across many different industries with supply contracts in multiple locations, and more than 20 million safe "over the road" miles transporting LNG.

REV LNG's marine arm **REV LNG Marine** connects offshore, inland and Great Lakes vessels, and marine accessible industrial customers, with stable and reliable REV LNG supply chains. By bundling the infrastructure, processes and technological innovations to optimize marine LNG value chains, REV LNG Marine provides quick-to-market, full turn-key bunker solutions and specialty marine services to meet the specific needs of every individual customer.

Together, we streamline and shape our services to meet your needs – whatever your vessel, wherever you're heading.
