

Introducing GAC Fuel Changeover Service

Helping you stay compliant ahead of the Global Sulphur Cap 2020 implementation

In order to be compliant by 2020, it is now time to prepare a ship-specific fuel oil changeover plan for your vessels if you do not already have a strategy for the installation of scrubbers or alternative fuels in place. GAC Fuel Changeover Service is both cost and time-effective and can help your business become compliant before the sulphur cap kicks into effect. Our full suite of services include:

Arrange suitable berthing

Discharge and dispose of ROB HFO in tanks

Tank cleaning and disposal of waste

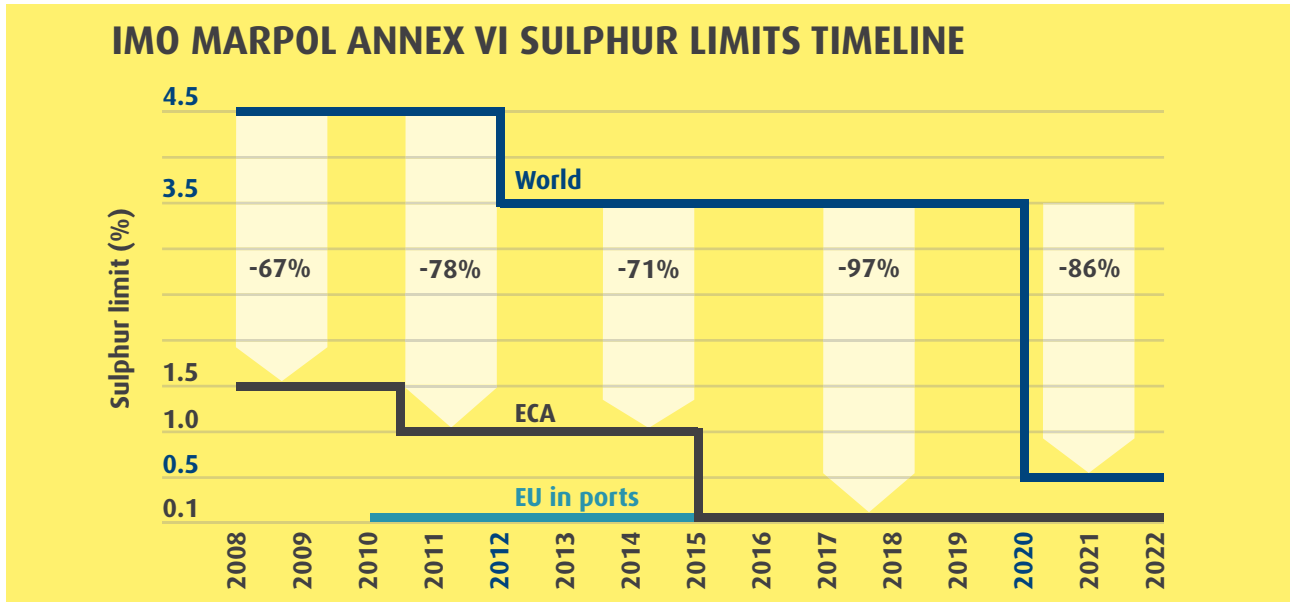

Refuelling of compliant fuel via GAC Bunker Fuels

Delivering your strategy.

Save time and money while staying compliant

Source: Wartsila

Non-compliance not an option

The penalties and consequences of non-compliance of the 2020 sulphur cap are heavy, including potential loss of insurance coverage and fines.

The IMO has also adopted a ban on ships carrying high-sulphur marine fuel unless scrubbers are installed, further tightening regulations. The ban will come into force on 1 March 2020 and makes it illegal for ships to carry high-sulphur fuel "for combustion purposes, for propulsion or operation on board" without scrubbers. The 0.5% limit will still be enforced from 1 January 2020.

Time is ticking, so get in touch with us and let us help you save time and money while staying compliant.

The GAC advantage

- Ship-specific fuel changeover plan
- Detailed pre-arrival planning to prevent delays or possible demurrage
- Competitively priced and compliant fuels
- One of the few ISO 9001:2015 and ISO 14001:2015 certified bunker companies
- Strong focus on business excellence, quality control and strict supplier vetting procedures
- Global network with hubs at strategic bunkering locations and forms part of the GAC Group's network of over 300 offices
- Integrated shipping, logistics and marine services for fuel efficiency and cost savings
