

# GAC Project Logistics

The muscle to move any project cargo globally

Whatever your project needs, from single domestic delivery to complex multi-shipments, let GAC do the heavy lifting for you.

Delivering your strategy.

Big projects mean big shipments. Whether it's an offshore drilling platform, a power plant, a paper mill or a port development, they all need parts that are too big, too heavy, or too oddly shaped to fit into neat little packages for transportation.

Moving such shipments takes skill, experience and the right equipment – GAC provides the muscle to shoulder any project cargo movement end-to-end.

With GAC Group's global network and solid track record in developing and executing complex project logistics solutions, we are the partner whom you can entrust your load.

From moving massive steel frames to delicate turbine engines, GAC Project Logistics has the skills and strength that guarantee safe and timely delivery worldwide – even to and from the most challenging and remote locations.

#### Total logistics capabilities

Drawing on our shipping, logistics and marine expertise, we offer flexible total packages for any project cargo requirements in turnkey projects.

We can manage any sized project from single domestic delivery to complex, multi-shipment and multi-modal project.

Beyond standard freight forwarding, our complete transportation solutions start from detailed planning through to cost-efficient final delivery with strict Health, Safety, Security & Environment (HSSE) compliance.

#### End-to-end efficiency

All operations are planned and executed with strong focus on minimising risks and costs, optimising resources and meeting deadlines.

Our innovative industry specialists effectively utilise technology to optimise shipment designs, calculate lashings and track shipments to strengthen our performance. No matter what challenges you face, we will find the best solution to lower your costs and lift your profits.

#### Full package

- Surveys & feasibility studies
- Multi-modal transport
- Full / part charter party
- Towage & barge operations
- Special equipment transport
- Operations supervision
- Stevedoring & terminal services
- Forward planning & cargo handling method statements
- Technical consulting
- Trace & trace

Today, our clients come from diverse sectors e.g. oil & gas, pulp & paper, mining, automotive, construction, power & energy, railway equipment and ship equipment & supplies.

GAC is one of the few service providers that use advanced Computer Aided Drawings (CAD) to design optimal stowage, loading and discharging procedures for heavy lift cargoes. In the virtual environment, a solution can be engineered in a day, as compared to weeks involving yard visits and meetings before the design process even starts.

## HIGHEST PERFORMANCE, SAFETY AND COMPLIANCE STANDARDS

#### Ethics and compliance

GAC Group is committed to quality, safety, compliance, honesty and transparency in everything we do.

Our operations are in full compliance with the Group's strict compliance and ethics policies – underpinned by the GAC Code of Ethics.

The Group's global reach provides security through one company

control, ensuring strict quality, HSSE and compliance implementation throughout the project life.

Commitment, flexibility and experience are central to the GAC approach to every project, whether it be a single shipment or the execution of a global Engineering / Procurement / Contracting (EPC) contract.

## THE CAD ADVANTAGE

## Proven track record in handling all types of project cargoes since the early 1970s

### About the GAC Group

GAC Group is a global provider of integrated shipping, logistics and marine services. Emphasising world-class performance, a long-term approach, innovation, ethics and a strong human touch, GAC delivers a flexible and value-adding portfolio to help customers achieve their strategic goals. Established since 1956, GAC employs over 9,000 people in more than 300 offices worldwide.

### The GAC advantage

- Wide geographical coverage
- Extensive experience with established track record in project logistics
- Complete solutions backed by ship agency, logistics and offshore support capabilities
- Cost-efficient services through the use of innovative transport combination and technology
- Long-term relations with specialists in sea, land and air operations
- In-depth knowledge of local regulations and practices
- Strict HSSE compliance
- Flexible tracking systems and advanced IT solutions
- Dedicated project teams with extensive technical and operational skills
