

GAC Egypt Hull Cleaning Services

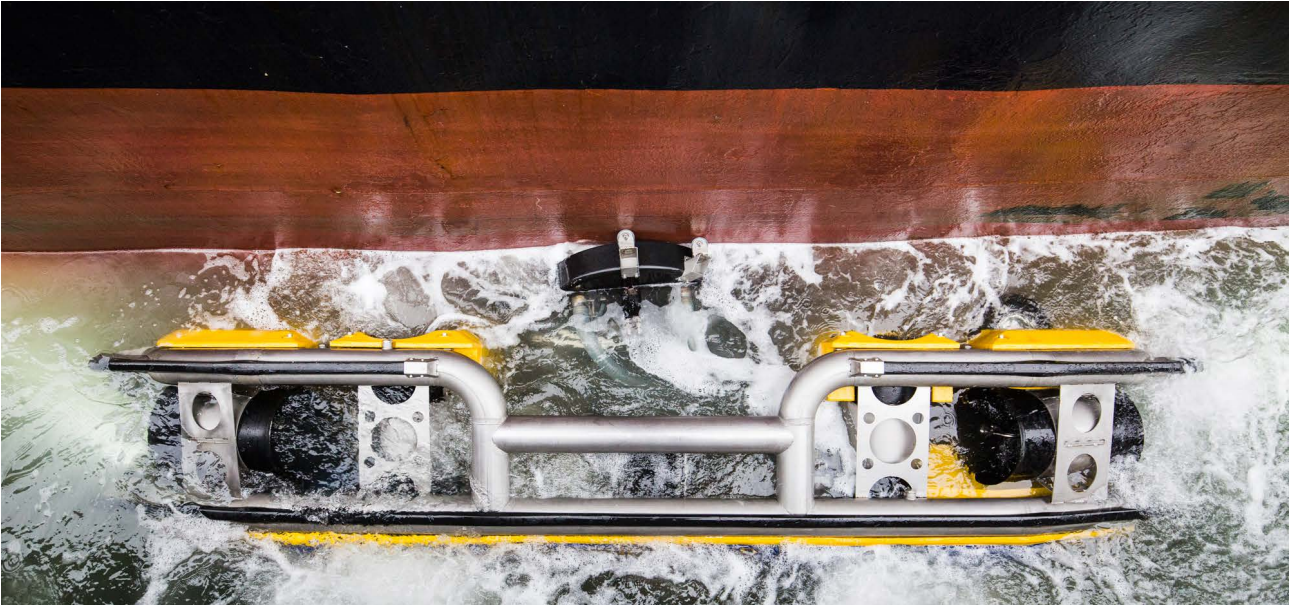

HullWiper provides safe, reliable and eco-friendly solutions for vessels transiting the Suez Canal

GAC Egypt has partnered with HullWiper Ltd to bring innovative, diver-free and affordable hull cleaning technology to your ships in the Suez. We deliver a full range of services to meet your vessels' needs, from transit agency, husbandry services and towage to cost-effective 'green' hull cleaning.

Delivering your strategy.

Optimise vessel performance and energy efficiency

The HullWiper Remotely Operated Vehicle (ROV) is a diver- and brush-free system that can clean whilst operations like loading/ discharging of bunker deliveries are underway, saving you valuable time and money. Cleaning with HullWiper's ROV can be carried out in most weather conditions.

Thanks to its unique waste filter that collects marine fouling during cleaning without contaminating the delicate marine environment, HullWiper is approved to operate within port waters. In accordance with Suez Canal regulations, cleaning is conducted during daylight hours only.

Complete Support

GAC Egypt is the market leader in the provision of agency services in the Suez

Canal. We combine our in-depth local knowledge, skills and strong relationships with authorities to keep your business on the move.

The GAC / HullWiper Advantage

- Suitable for all types of commercial vessels
- No need for divers
- Does not use brushes or abrasives
- Minimises damage to expensive anti-fouling coatings
- Affordable, safe and eco-friendly
- All operations conducted in line with GAC Group's stringent Health, Safety, Security and Environment (HSSE) policies.

Compliant with local and regional environmental regulations.
