

GAC Norway NOx Representative Services

Expert navigation of the NOx emissions tax systems
part of GAC Norway Environmental Services

We provide specialist services to help you navigate the tax on NOx emissions in Norway and the Norwegian continental shelf.

Delivering your strategy.

Protect your bottom line

GAC Norway is registered with the NOx foundation through the Ministry of Environment. Our environmental agreement allows us to perform tax reporting on behalf of vessels with reduced tax rates, paying only 27% of the full tax rate.

Norwegian waters

The NOx tax applies to emissions in Norway and on the Norwegian continental shelf, for vessels with installed engine power of more than 750kW.

Vessel owners are responsible for NOx tax payments and reporting. With the assistance of a local agent, a NOx affiliation number

must be submitted to the Norwegian Maritime Directorate and customs authorities prior to the vessel's arrival in Norway.

NOx tax is calculated based on fuel consumption and engine performance data, with full rate of 21,94 NOK per kg NOx.

The GAC advantage

- Dedicated and experienced team
- Round-the-clock operations
- High standards of conduct
- Quality assured
- Source of reliable market intelligence
- Efficient supply chain
- Cost-effective solutions

We are Achilles JQS and ISO 9001:2015 certified.
