

GAC Norway Customs Services

Clearance of oil and gas products

Your trusted partner for oil and gas
product clearance to or from Norway.

Delivering your strategy.

Whether it's crude, processed products or gas, there will always be a need for customs clearance when transporting oil & gas derivatives to or from Norway.

This meets the requirements of both Norwegian regulations and formalities to be granted for eventual preferential tax treatment for imports related to various trade agreements.

Star quality local expertise

Import and export declarations, certification of origin, EUR 1 certificates or preferential statements

are all typical formalities to these cargo types.

GAC Norway's customs department has the in-depth experience and local knowledge to assist with the different clearance procedures for various products whether in bulk or delivered by pipelines.

Our first-rate consulting services provide you with the support you need to obtain the required licenses to ensure swift formalities and clearance procedures.

The GAC advantage

- Dedicated and experienced team
- Round-the-clock operations
